

How do I set up Mail Output combining in Lاسernet?

Mikael Wängelin - 2023-01-26 - Comment (1) - Lاسernet Developer FAQs

Lاسernet

Combining in the Mail Output module works slightly differently than in other combining modules. Rather than combining multiple documents generated by Lاسernet into one document, the Mail Output module allows multiple generated documents to be attached to an email as separate attachments. This email can then be sent to multiple email addresses as required.
