

Number of characters in UNC Path

- 2024-10-11 - Comments (0) - Lاسernet Developer FAQs

Lاسernet

The standard default maximum length for a UNC path in the File Output Port is 260 characters for Windows API.

A local path is structured as follows:

```
C:\Lasernet\Output\
```

or

```
\\<Local machine>\<Local path>\
```

Local computers

For local computers, an extended-length path can be supported for a maximum total path length of 32.767 characters. To specify an extended-length path you can use a prefix:

```
\\?\C:\<Very long local path>\
```

or

```
\\?\<Very long local path>\
```

Shared network drives

To support extended-length path for shared network drives, ensure you are using Lاسernet 6.7.6, Lاسernet 7.1 or above and type: '\\?\UNC\<Server>\<Path>\'.

Additional information

See [MSDN](#) for details about file and path restrictions.
