Compatibility of Dynamics 365 Finance and Operations 10.0.44 (PU68) with Lasernet FO Connector

2025-05-21 - Alice Petruzzella - Comments (0) - Lasernet FO Connector News

This news article provides an update on the Dynamics 365 Finance and Operations Preview for version 10.0.44 (PU68) and its compatibility with Lasernet FO Connector 7.1.2.

Note

The issue described in this article is only relevant to customers using **SharePoint** as an archive option.

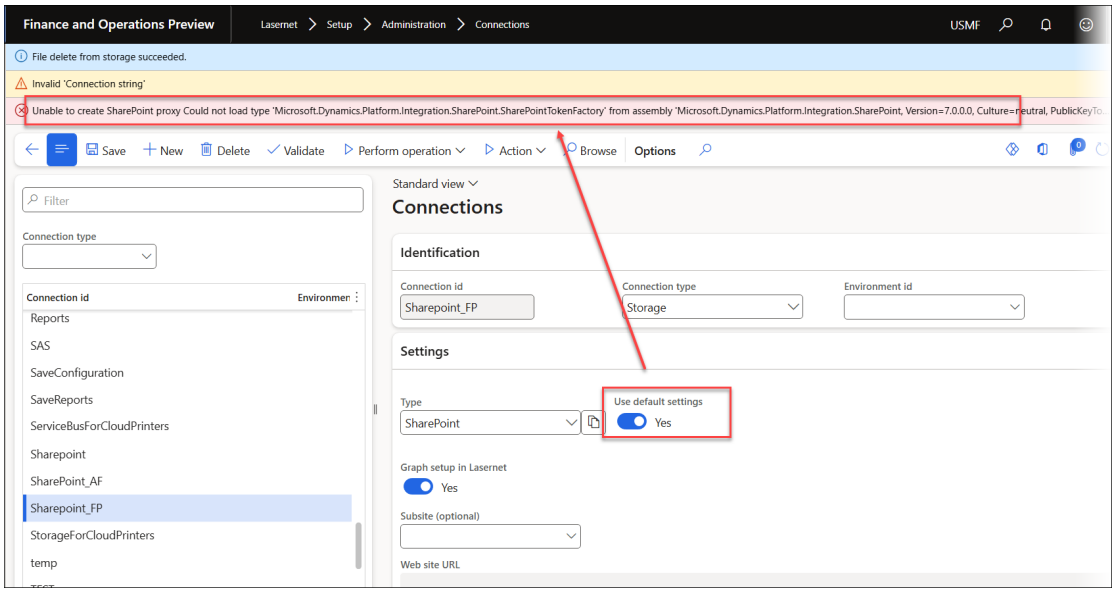

When using the Preview for 10.0.44 (PU68) with Lasernet FO Connector 7.1.2, an error occurs regarding SharePoint. This is caused by Microsoft's removal of the class responsible for generating the token for SharePoint.

A new version of Lasernet FO Connector (7.1.3) is being developed to resolve this issue.

You will need to upgrade only when using the default connection/authentication provided with FinOps.

This error does not affect the connection between Lasernet FO Connector and SharePoint if **Use default settings** is disabled, as the system uses Formpipe's own authentication (OAuth), which is provided as part of the Connector.

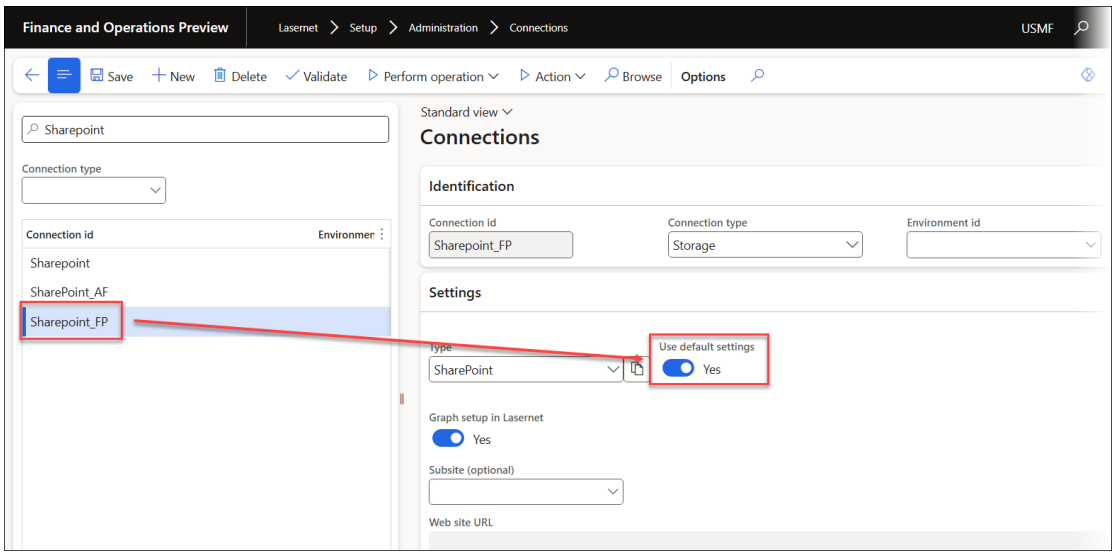

The following error occurs when using Lasernet FO Connector 7.1.2 with the Preview for 10.0.44 (PU68):

Error

Unable to create SharePoint proxy Could not load type 'Microsoft.Dynamics.Platform.Integration.SharePoint.SharePointTokenFactory' from assembly 'Microsoft.Dynamics.Platform.Integration.SharePoint, ...

This is an issue only when enabling **Use default settings** (connection via standard FinOps):
