# Lasernet FO Connector 6.18 Released!

2022-09-23 - Pernille Wichmann - Comments (0) - Lasernet FO Connector News

Lasernet FO Connector 6.18 is now available for download here on our support portal.

Remember to read through the release notes, as they contain examples of how new features may be applied. The software package, manuals and release notes may be found here:

- Click to view Lasernet FO Connector 6.18 Release Notes
- Click to download the Lasernet FO Connector 6.18 Installation Package
- Click to view the new features, enhancements, and fixes

The package for Lasernet Connector exists for Dynamics 365 for Finance & Operations **PU52** and **PU53.**

There is no need to install a new package when upgrading Dynamics 365 for Finance & Operations. The originally installed Lasernet Connector package for Dynamics 365 for Finance & Operations will work after the upgrade of PU.

The recommendation from Microsoft is to use an ISV/LAC-package matching the same build or PU as this could lower the memory usage. However, all (three) Lasernet FO Connector packages contain the same code and will work across versions.

Deployments or Installations of Lasernet FO Connector packages are forward compatible and therefore it is not possible to deploy or install a **Lasernet Connector package for PU53** when using Dynamics 365 for Finance & Operations **PU49** or **PU50**.
