Document Layout Version Issue in Lasernet BC Connector 4.4.0.0

2025-11-07 - Alice Petruzzella - Comments (0) - Lasernet BC Connector News

Customers and partners using Lasernet BC Connector 4.4.0.0 may encounter an issue where custom fields are missing from **Document Layout**.

Upgrade!

The newest version of Lasernet BC Connector has been released. Upgrade now to Lasernet BC Connector 4.4.0.1 to fix this issue.

This issue is only encountered with one of the possible configurations, as follows:

Document Layout Version selection setup		
Lasernet Setup	**Report Setup**	**result**
V1	empty	**!issue**
V1	V1	V1 is used
V1	V2	V2 is used
V2	empty	V2 is used
V2	V1	V1 is used
V2	V2	V2 is used

If this affects you, as a temporary workaround, we recommend setting the value for **Document Layout Version** to **V1** on the **Lasernet Report Setup** form.
